**Overview**

This Product Specification defines the general use and performance parameters for Amphenol’s LUSB, USB with positive locking series of connectors.

**Availability**

USB 2.0 series type A, right angle PCB mount. USB 3.0 series type A, right angle PCB mount available now. USB 2.0 series type A, vertical planned for future release.

**Usage**

The connector system is designed to provide a standard USB interface with a unique latching mechanism to prevent the unintentional interruption of data transmission. The latch must be intentionally raised in order to remove the plug. An accidental pull on the cable up to 50N (11.2lbs) force will not separate the connectors.

**Applications**

Intended for use in applications such as:

- Medical equipment
- ATM machines
- Lottery Terminals
- GPS
- Military Vehicles, radios, PDA
- Hand Held Data Loggers
- Mobile Entertainment Systems
Connector Electrical Characteristics
Maximum current: 1.5A per contact for USB 2.0
1.8A for positions 1 & 4 with 0.25A on remaining positions on the USB 3.0
Contact resistance: 30 mΩ max
Insulation Resistance: 1000 MΩ min
DWV: 500 VAC @ sea level

Connector Mechanical Characteristics
Standard USB interface
Thermal Shock: 10 cycles -65°C to +105°C
Physical Shock: Per EIA-364-27 Condition H (11ms 30G)
Humidity: Per EIA-364-31B, Method III, Condition B
Vibration: Per EIA-364-28D per Condition V, Test A
Durability: 1500 mating cycles
Insertion Force: 35 N (7.87 lbs) max
Withdrawal Force: 8 N (1.8 lbs) min with latch disengaged

Material Requirements
LUSB connectors are RoHS compliant.
Unless otherwise specified, the materials for each component shall be:

Connector
- Contacts
  - Base material: Copper alloy
  - Plating: 30 µ” (0.76 µm) min Gold over Nickel
- Housing: High temperature thermoplastic, UL94V-0 rated, Black
- Shell
  - Base material: Copper alloy
  - Plating: Nickel
- Locking Tab: Stainless Steel

Temperature rise: Meets the requirement of 30° C ΔT
Operating temperature -40° to +85° C
