Company Status Following the Earthquake in the Tohoku Region (3rd Report)

We wish to update the status of JAE following the earthquake that occurred on March 11, 2011 in the Tohoku region of Japan. (3rd Report)

Regarding Hirosaki Aviation Electronics (HAE) in Hirosaki City, Aomori Prefecture, we had been preparing for production by inspecting production equipment. Although the power supply currently provided by Tohoku Electric Power is not sufficient for normal production level, we resumed production at HAE on Tuesday, March 15.
