

Sumitomo Electric Interconnect Products, Inc.

March 21, 2011

Dear SEIP Representatives and Customers:

As I am certain you are aware, a major earthquake and Tsunami have caused extensive damage and loss of life in the North-Eastern part of the main island of Japan.

Correspondingly, SEI, Ltd. has set up an emergency center in the Osaka Headquarters following this disaster. Our parent company in Japan, SFP, Inc. coordinates with this emergency center to receive the latest information related to the on-going ability to provide goods and services to our customers.

To date, there is no reported loss of life amongst the SEI Group companies, and the SUMITUBE™ manufacturing facilities in Japan were not affected by this event. At this time, SEIP will continue to import certain products manufactured and provided by SFP, Inc. in Japan without interruption. Our manufacturing facilities in San Marcos are in stable condition with no diminished capacity to meet production requirements for locally manufactured SUMITUBE™, STS and SUMIMARK™ products.

SEIP will continue to provide up-dated information as the circumstances develop, as changes may develop. We thank you for the many expressions of sympathy and the kind offers of support.

Sincerely,

Nobuyoshi (Nobi) Fujinami
President/ CEO
