Current Situation Japan  
15 March 2011

To whom it may concern:

Yamaichi Electronics would like to kindly inform you about the current situation in Japan and the influences of the earthquake and subsequent tsunami occurred on March 11 at the Pacific coast of Northeastern Japan:

**1. Employees**

No casualties to employees occurred at Yamaichi Group Companies.

**2. Operations**

Damage by the earthquake to the production sites of Yamaichi Group Companies was very limited.

**3. Logistics**

Due to the confusion of logistics, both domestic and international, we expect certain influence on shipment of our products in the midterm. The shortage of electric power in Japan and damages to our suppliers may bring considerable impact to our production and delivery in the future.

But at the moment, we do not see any product shortage for our customers due to the current situation. Detailed information about possible delays in deliveries will be announced by next week.

We, all employees at Yamaichi Group Companies, sincerely express our sympathy to the victims of the earthquake and their families and hope that everyone recovers as earliest as possible.

**Yamaichi Electronics USA Inc.**
