

## A new rugged platform for **EXTREME** environments

### Applications

Typical applications for the **8XE** are Geophysics & Oceanography, Military applications (ground army), Civil security.

*Please contact us for specific requirements*

### Features & Benefits

- Housing made of high impact glass filled plastic
  - = High **impact & shock resistance**
  - = Drop & crush resistance
- Ergonomic shape with overmolded ring
  - = **Easy, reliable & secure** mating in extreme environments
- **IP68** sealing level
  - = Excellent sealing performance for extreme applications
- Hard anodized plating in standard
  - = High **salt spray resistance**
- **Intermateable & interchangeable** with **MIL-C-26482**
  - = Multisource product for receptacles
- Designed bend restrictor for maximum cable bend radius
  - = Enhanced cable sealing
- Offers design flexibility
  - 7 shells sizes from 10 to 22
  - Several layouts available
  - Option for cable discrimination using various insert orientations
  - Different colors available – please consult us
