Trim Trio[®] Connectors with discreet wire sealing

UTS

Field applications

The **UTS connectors with cable grommet sealing** can be used on almost any product exposed to environmental conditions : Equipment and machines for public works, agricultural machines, trucks, tractors, trailers, outdoor enclosures etc.

Features & Benefits

A discreet sealing solution

✓ Uses proven **grommet technology** from Souriau's extensive knowledge of **harsh environments**

✓ Sealing level : IP67 & IP69K

A **grommet with three sealing barriers** capable of handling cable insulation diameters from 1.7 to 3.0 mm

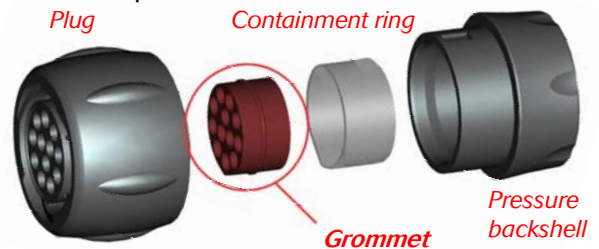

Each grommet cavity has a membrane that is pierced only when a terminated wire is loaded :

- ✓ No need for filler plug
- ✓ In case of a cabling error or modification, filler plugs may be used

Provides an easy to assemble solution

✓ Grommet retained by a simple backshell to maintain a pressure seal

SOURIAU's offering:

✓ Grommet version available for the 14-12 layout with **female plugs & male receptacles**

✓ For additional configurations, please consult factory

✓ Grommet version also interchangeable for the UTO (Metal Circular type) TRIM TRIO[®] series
