

## Shunted Connector for information duplication

### Features & Benefits

- Robust coupling **EN3646** or **MIL DTL 38999** connectors integrating shunted contacts
- Enables **duplication** or **derivation** of informations, **for fast and secured transmission** :
  - . Simultaneous information distribution to different locations
  - . Possibility of signal redundancy

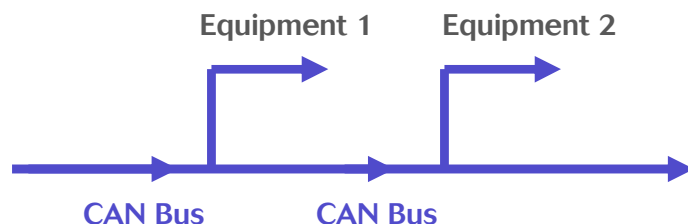

One « INPUT »  
More than two  
« OUTPUT »

### Applications

**Shunted connectors** are typically used in Aeronautic, Missile and Autosports Networks such as **CAN Bus** networks.

- In case of a **CAN Bus**, the Network will still work even if an equipment fails

- Plug and play solution : replaces external shunt operations, **space and cost savings**
- Excellent **EMI protection**
- **Airbus ABS1425 qualified** for EN3646 version
