

Amphenol RF completes qualification process for QN Products (2006-11-13)

Danbury, CT – November 13, 2006 – Amphenol RF today announced that it is now authorized to market the QN interface as a member of the Quick Lock Formula® Alliance. Amphenol RF signed a QMA and QN license agreement with Huber + Suhner AG and Radiall SA earlier this year and is now QLF® certified on both the QMA and QN interface. This membership is another example of Amphenol RF's commitment to providing quality interconnect solutions for its customers' product designs.

The QLF Alliance includes RF interconnect companies with certified intermateable QMA and QN connectors which are quick disconnect versions of the SMA and Type N connectors. Both offer a more convenient installation with its patented snap-on interface in place of a threaded coupling. Only QLF Alliance members can guarantee product intermateability between manufacturers. The members are Huber+Suhner AG, Radiall SA, Rosenberger Hochfrequenztechnik GmbH & Co. and Amphenol RF. For further information on the QLF, visit www.qlf.info.

Amphenol RF is a leading manufacturer of RF interconnect solutions for more than 50 years. Its products serve a variety of markets including Wireless Infrastructure, Broadband/Telecommunications, Automotive, Military/Aerospace, and Instrumentation markets. Amphenol RF's solutions range from connectors to cable assemblies to passive radio frequency components, such as attenuators and RF switches.

Amphenol Corporation (NYSE: APH) is one of the largest manufacturers of interconnect products in the world. The Company designs, manufactures and markets electrical, electronic and fiber optic connectors, coaxial and flat-ribbon cable, and interconnect systems.
